

## CK-01 collimator target sight

---

CK-01 target sight is designed for a multicalibre 12,7mm machine-gun. Its purpose is to sight and follow the route of air, ground, and sea targets.

It is to be used with weapons and ammunition of particular battle properties. A target-sight sign, target-sight net takes into account the most probable types of targets and shooting distances. CK-01 is equipped with a special screen so as to ensure the best visibility of the net that is moved forwards and backwards. It protects against reflection of the sunlight and covers prismatic optical surface of a target sight from falls of rain, snow etc., and seawater.

CK-01 target sight allows the regulation in elevation and azimuth planes by means of 10 mm wrench. 1. A target sight net is shown on the prism through which a shooter observes his target.

CK-01 is supplied with a casing where it should be kept.

### Basic tactical and technical data

Magnification	1x
Filed of vision	min. 5° (at eyes' distance of 200 mm)
Adjustment range	1°12'
Height	125 mm
Width	55 mm
Weight	0,85 kg
